Adding Fractions

$$1) \frac{7}{10} + \frac{3}{4} + \frac{1}{2} = \frac{14}{20} + \frac{15}{20} + \frac{10}{20} = \frac{39}{20} = 1 \frac{19}{20}$$

$$2) \frac{2}{4} + \frac{1}{2} + \frac{3}{10} = \frac{10}{20} + \frac{10}{20} + \frac{6}{20} = \frac{26}{20} = \frac{13}{10} = 1 \frac{3}{10}$$

$$3) \frac{1}{3} + \frac{1}{2} + \frac{3}{4} = \frac{4}{12} + \frac{6}{12} + \frac{9}{12} = \frac{19}{12} = 1 \frac{7}{12}$$

$$4) \frac{3}{4} + \frac{6}{10} + \frac{4}{5} = \frac{15}{20} + \frac{12}{20} + \frac{16}{20} = \frac{43}{20} = 2 \frac{3}{20}$$

$$5) \frac{1}{3} + \frac{1}{4} + \frac{1}{10} = \frac{20}{60} + \frac{15}{60} + \frac{6}{60} = \frac{41}{60}$$

$$6) \frac{1}{3} + \frac{1}{2} + \frac{6}{10} = \frac{10}{30} + \frac{15}{30} + \frac{18}{30} = \frac{43}{30} = 1 \frac{13}{30}$$

$$7) \frac{3}{5} + \frac{1}{2} + \frac{3}{4} = \frac{12}{20} + \frac{10}{20} + \frac{15}{20} = \frac{37}{20} = 1 \frac{17}{20}$$

$$8) \frac{1}{4} + \frac{6}{10} + \frac{1}{2} = \frac{5}{20} + \frac{12}{20} + \frac{10}{20} = \frac{27}{20} = 1 \frac{7}{20}$$

$$9) \frac{3}{4} + \frac{2}{3} + \frac{4}{5} = \frac{45}{60} + \frac{40}{60} + \frac{48}{60} = \frac{133}{60} = 2 \frac{13}{60}$$

$$10) \frac{1}{2} + \frac{9}{10} + \frac{2}{3} = \frac{15}{30} + \frac{27}{30} + \frac{20}{30} = \frac{62}{30} = \frac{31}{15} = 2 \frac{1}{15}$$
